

# BARIATRIC SURGERY

DR. TRINO ANDRADE

GASTRIC SLEEVE

# BARIATRIC SURGERY

---

Over the years, people suffering from excess weight and obesity have used alternatives like exercise, diet, and medicines to control their weight. Despite their efforts, the majority of people still end up suffering from complications like hypertension, heart attacks, hormonal alterations, erectile dysfunction, diabetes, strokes, and joint damage, among other problems.

**Today, BARIATRIC SURGERY is the best choice for sustainable weight loss that lets patients achieve a healthy weight.**

# GASTRIC SLEEVE

- The surgery works by regulating

**Adiponectin**  
(the “satiety” hormone)

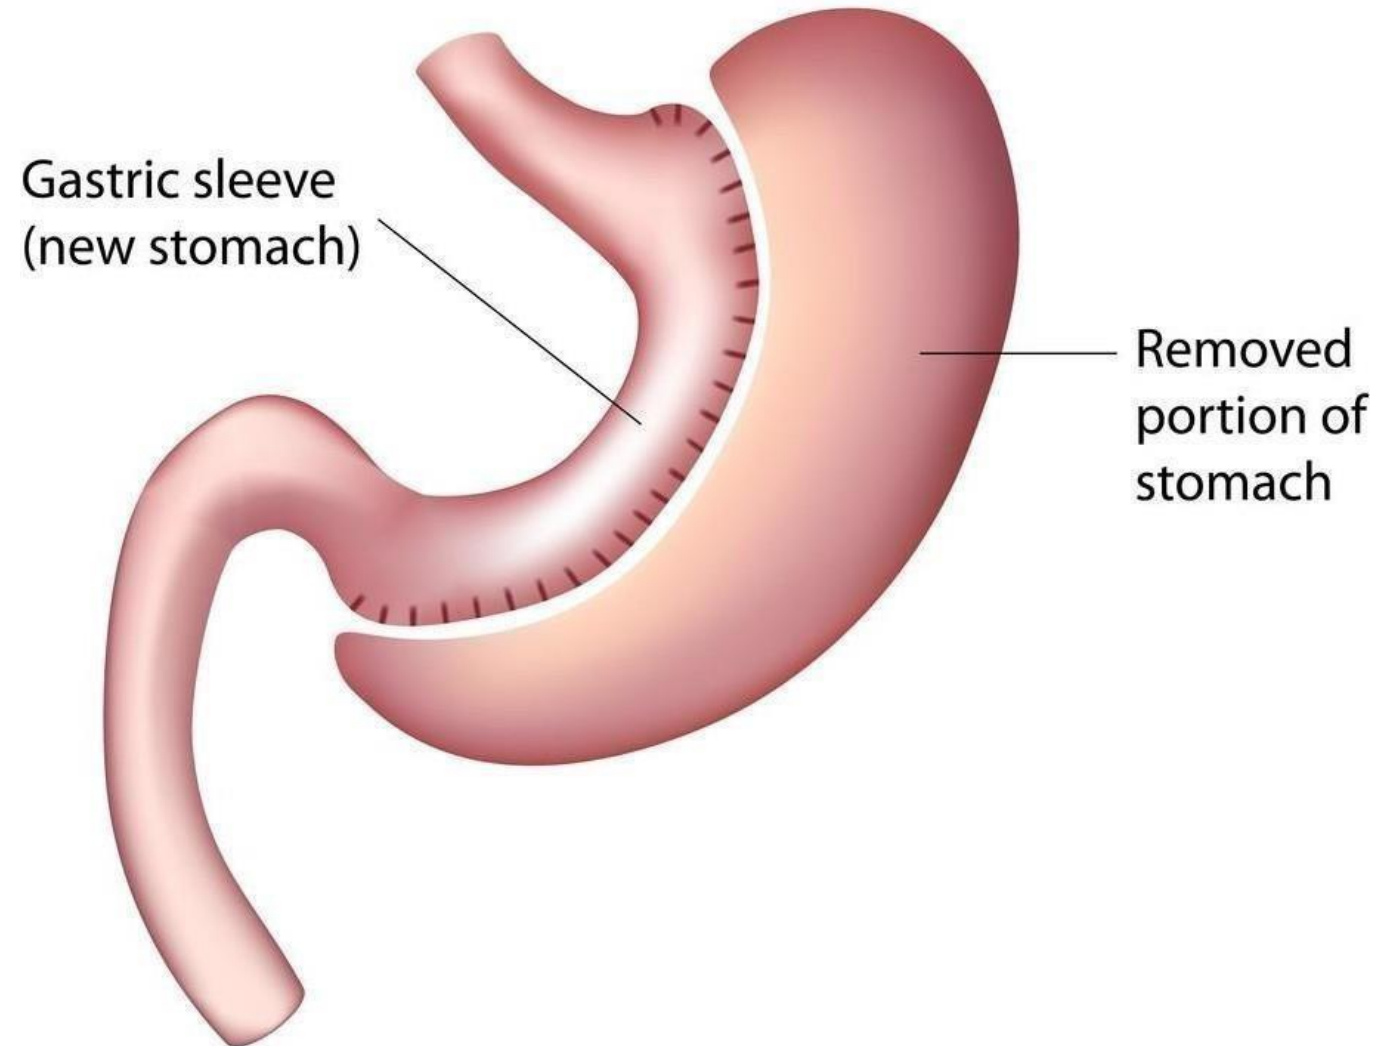

**The 45-minute intervention**

Requires a one-night  
hospitalization

**Immediate recovery**

(about 72 hours)

- This technique **does not** affect the body’s  
absorption of vitamins or minerals.

# Patients who have undergone the weight-loss operation improve their quality of life and their self-esteem.

The surgery is minimally invasive; we don't cut open the patient, so there are better cosmetic results.

The surgery is done laparoscopically (2 incisions of 0.5cm and a 1cm camera)

**INTERHOSPITAL**  
SU SALUD ES NUESTRO COMPROMISO

We operate out of InterHospital in the  
city of Guayaquil – Ecuador.

We have the most prestigious doctors, the highest quality standards  
and Smart Bariatric Operating Rooms

# COSTS

The cost of the surgery is \$8,000 dollars all included. The price covers the costs of the clinic, the hospitalization, medicine, medical fees, materials, etc.

We accept all credit cards

The procedure is not done through the Ecuadorian Institute of Social Security

- Foreign patients don't need to reserve a hotel before coming, we help you with all the logistics regarding accommodation in our all-inclusive package.
- Patients from outside of the country should stay in Guayaquil for 5 days in total.

Over 8000 succesful operations
